UPPSALA

The Uppsala is powerful yet frugal, designed to keep your house warm 24/7 whilst maintaining a clean burn even when shut down. Easy to operate, the heater produces steady warm air almost immediately after lighting, and powerful natural convection will distribute air quickly throughout your house. Radiant heat from the soapstone heat bank will give you warmth for many hours even after the fire has gone out, making the need to burn overnight in most cases unnecessary.

Uppsala has Euro Fireplaces longest embers retention of 9 hours plus.

Heating capacity	280sqm
Efficiency	Aus 70% / Eu 81%
Emissions	1.5g
Wood usage	2kg/hr
Weight	309 kg
